

**401030 to 401416—Continued****401319 to 401339—Continued**

- 401329.** D-1136, D-1137. Bulk sample. Toward Ahar, 33 km northeast of Tabriz. Elevation 1,500 m. Caespitose plants with culms to 60 cm, short rhizomes. Wild.
- 401330.** D-1139. Toward Ahar, 44 km northeast of Tabriz. Elevation 1,825 m. Bulk sample. Wild.
- 401331.** D-1143. Toward Meshkinshar, 21 km east of Ahar. Elevation 1,300 m. Most plants with glaucous culms. Bulk sample. Wild.
- 401332.** D-1170. Between Meshkinshar and Ardebil, north base of Sabalan mountain. Elevation between 2,300 and 2,400 m. Caespitose plant with glaucous culms to 70 cm. Single clone. Wild.
- 401333.** D-1171, D-1172. Bulk sample. Between Meshkinshar and Ardebil, north base of Sabalan mountain. Elevation between 2,300 and 2,400 m. Plant with glaucous culms 60 to 70 cm. Wild.
- 401334.** D-1173. Between Meshkinshar and Ardebil, north base of Sabalan mountain. Elevation between 2,300 and 2,400 m. Plant with glaucous culms to 55 cm. Single clone. Wild.
- 401335.** D-1174. Between Meshkinshar and Ardebil, north base of Sabalan mountain. Elevation between 2,300 and 2,400 m. Most plants with glaucous culms and pigmented spikes. Bulk sample. Wild.
- 401336.** D-1175. Toward Ardebil, 30 km east of Meshkinshar. Elevation 1,300 m. Bulk sample. Wild.
- 401337.** D-1180. Toward Ghazvin, 120 km south of Rasht. In dry, rocky slope. Elevation 900 m. Most seed had shattered by August. Bulk sample. Wild.
- 401338.** D-1187, D-1188, D-1190, D-1191, D-1192, D-1193, D-1194, D-1216. Bulk sample. D-1187 through D-1191 between Gachsar and Shemshak, high elevation area of Alborz mountains, north of Tehran. Elevation 2,200 m. Caespitose plants with culms 75 to 80 cm. Wild. D-1192 between Gachsar and Shemshak, high elevation area of Alborz mountains, north of Tehran. Elevation 2,300 m. Caespitose plant with culms to 80 cm. Short rhizomes. Wild. D-1193 between Gachsar and Shemshak, high elevation area of Alborz mountains, north of Tehran. Elevation 2,350 m. Caespitose plant with glaucous culms to 80 cm, short rhizomes. Wild. D-1194 between Gachsar and Shemshak, high elevation area of Alborz mountains, north of Tehran. Elevation 2,500 m. Caespitose plant with glaucous culms to 60 cm. Spikelets curved outward. Wild. D-1216 between Gachsar and Shemshak, high elevation area of Alborz mountains, north of Tehran. Elevation 2,200 m. Plant with dark green culms to 75 cm. Short rhizomes, large glumes. Wild.
- 401339.** D-1189. Between Gachsar and Shemshak, high elevation area of Alborz mountains, north of Tehran. Elevation 2,200 m. Caespitose plant with culms to 70 cm. Single clone. Wild.
- 401340.** AGROPYRON sp.  
D-270. Mooteh wildlife protected region, 9 km north of headquarters. On dry, rocky slope. Elevation 2,050 m. Erect bunchgrass with culms to 85 cm. Narrow leaves, truncate glumes. Single clone. Wild.
- 401341.** AGROPYRON sp.  
D-851. Toward Chalus, at Seritchal protected watershed above Karadj dam, 40 km north of Karadj. Elevation between 2,000 and 2,300 m. Caespitose plant with green culms to 90 cm. Short rhizomes, truncate glumes. Single clone. Probably *A. podperae*. Wild.
